

THE ARCHETYPE PROCESS

Before installation

The Archetype Process profiles are compatible with Adobe Lightroom Classic 7.3 and newer, Adobe Lightroom 1.3 and newer and Adobe Camera Raw 10.3 and newer. Earlier versions do not support The Archetype Process profiles.

Before you continue with installation, please save your download to somewhere safe on your computer so that you can have a backup should you need to re-install, or install on another computer.

Installation

Lightroom Classic for Mac & PC

1)

Unzip the original installation download, but please do not unzip the other zip file(s.) You should see “The Archetype Process Installation Guide” and “The Archetype Process (Kodak Pro, Fujifilm Pro, Monochrome).zip”

2)

Launch Adobe Lightroom Classic

3)

With the Develop Panel active, go to File>Import Develop Profiles and Presets and select the The Archetype Process (Kodak Pro, Fujifilm Pro, Monochrome).zip file you are installing.

4)

Once installed, the profiles will be available in the Develop Module at the top of the Basic Panel right below, “Treatment.”

Profile naming

Adding to Favorites

Each The Archetype Process Profile Pack contains dozens of profiles of which you may only want to use a few.

To add them to your Favorites section in either the Grid or List view, simply click on the star icon on the right hand side of the profile name.

These favorites selections carry across Lightroom Classic, Lightroom (including Lightroom Mobile on iOS and Android devices) and Adobe Camera Raw.

Adjusting the Amount

Right below the profile name in the Basic Panel, there is an, “Amount” slider, which can be used to dial in the amount/opacity of the profile selected.

The Amount Slider ranges from 0 to 200, so unlike the opacity slider inside of Photoshop’s Layers panel, you can go beyond 100% and increase the intensity of the profile, which can yield some wonderful results.

Dialing back the amount slider is also a great way to introduce film looks into your current work that you feel could benefit from some of the film look, but not all of it. It’s also a great way to slightly increase the amount over time if you are evolving your look and don’t want to make a drastic change quickly.
