

# ARCHIPELAGO

LR / ACR PRESETS & CREATIVE PROFILES

Welcome to Archipelago, a community of photographers united by a passion for our craft and a growing collective of some of the world's finest Lightroom Presets and Post-production tools. Our presets and creative profiles are designed to support and enhance every style of photography: portraiture, landscape, wedding, commercial, editorial, and beyond. At the foundation of the brand lies a holistic approach, marks of master craftsmanship in tools made "by photographers for photographers." With over 12 years of creating industry-defining post-production tools, we've learned that, like great artistry, the creation of great presets/profiles takes knowledge, time, dedication, and a willingness to change. Our creators are leading this ever-evolving industry through continuous learning and through regularly developing fresh, cutting-edge editing tools for our Collective.

At (Red Leaf Studios Inc) Archipelago, we are firm believers in social, racial, & environmental justice. Since its beginnings in the Pacific Northwest, the Archipelago community has spread throughout the world. We recognize that growth comes with responsibility, and we believe ours is to give back a portion of our revenue to various non-profits that are near to our hearts. Through your generosity, Archipelago supports a number of non-profits that are dedicated to preserving our planet, and fighting for social & racial justice and equality.
