Introduction

Hello There!

Thanks for purchasing this package that contains a multi professional Photoshop Presets. to use this package, you need to install ***FX Prism*** plugin, the first world Photoshop plugin that will help you to generate FX's easily and in 01 click, the plugin is for free.

This pack contains **70 Photoshop Presets in 08 different categories:**

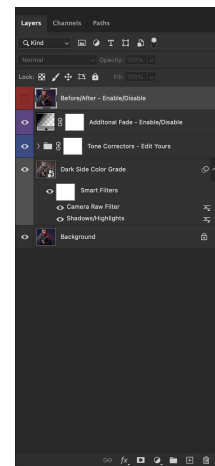

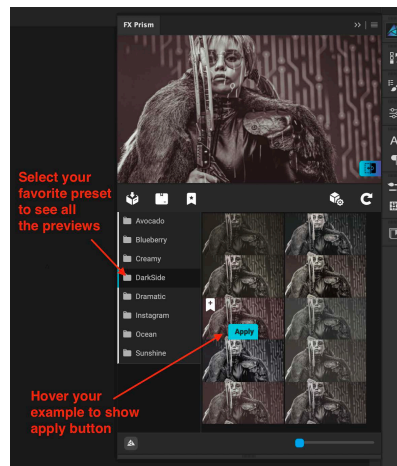

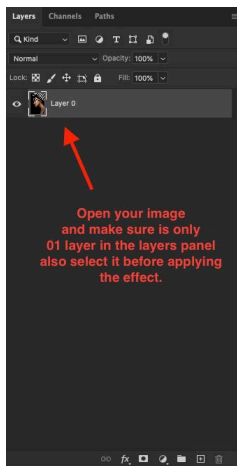

- 05 Avocado Timeline Presets.
- 05 Blueberry Grade Presets.
- 10 Creamy Tone Presets.
- 10 Dark Side Color Presets.
- 10 Dramatic Times Presets.
- 10 Instagram Mood Presets.
- 10 Ocean Color Presets.
- 10 Sunshine Vibe Presets.

We made a detailed pages that will explain everything you need to know about those Presets.

Open Your Image Only.

This method is for all effects (**Avocado - Blueberry - Dark Side - Dramatic - Creamy - Instagram - Ocean - Sunshine**).

- All effects need only your image, so make sure you've only 01 image inside your layers panel.
- For better result make sure your minimum image width or height is 3000px.
- Open **FX Prism plugin**, and select **Pluto Package** if you have more than 01 package, in the left menu select **The Preset that you want to apply**, then move your mouse over 01 of the FX's and you'll see **Apply** button, click on it and wait a few seconds until the process ends
- Edit your final result as you wish, Done!

Contact us

Our mission is to help you save your time, and we mean that even if you contact us our support team is here to help you in the work hours (10am - 19pm GTM+1).

To make our team help you perfectly make sure you've describe your issue correctly and if that possible to send a screenshot of your issue.

If you can send also a screenshot of your panel layers when you get a problem throw the FX Applying process that will help to understand the source of the problem.
