

# How to Import Presets to Lightroom CC

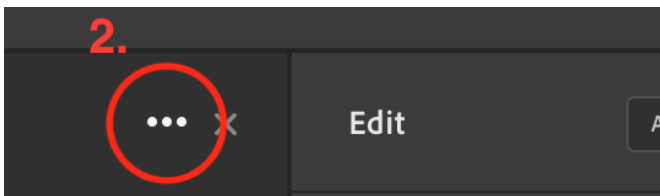

## GUIDE | PRODUCT INSTALLATION

### STEP ONE

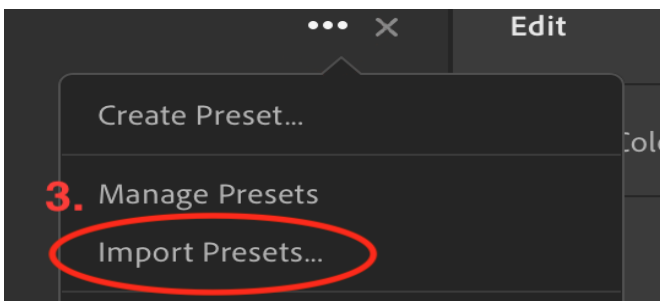

In Lightroom CC, select **'Presets'** in the bottom right corner.

### STEP TWO

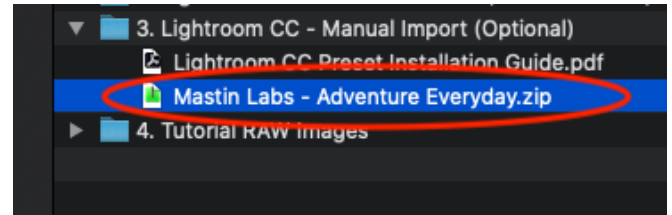

Click the **three dots (...)** from the top right of the Presets panel that slides out.

### STEP THREE

From the dropdown menu, select **'Import Presets.'**

### STEP FOUR

Navigate to and open the .zip file you downloaded from Mastin Labs. Open the **'3. Lightroom CC - Manual Import (Optional)'** folder and double-click the **[preset pack].zip** file.

### IMPORTANT NOTICE

Please make sure you are running Lightroom CC 1.3 or newer (this is required: more product requirement details).

### NEED HELP?

If you are still experiencing issues, send an email to [support@mastinlabs.com](mailto:support@mastinlabs.com) or view our support page about Software Requirements.

Continue the process for each Mastin Labs preset pack you purchased.

Thank you!
